PROFESSIONAL SUMMARY

Forward-thinking Computer Science Engineer specializing in the intersection of **DevOps** and **Artificial Intelligence**. Proficient in automating the deployment of Generative AI applications using **CI/CD** pipelines, **Docker**, and **Kubernetes**. Skilled in managing cloud-native infrastructure (**AWS**) and integrating LLM-based solutions into enterprise workflows. **ServiceNow** Certified Developer with a focus on building efficient, scalable, and AI-driven automation systems.

TECHNICAL SKILLS

- **AI & Machine Learning:** LLM Integration (OpenAI/Ethara AI APIs), Prompt Engineering, RAG Pipelines, MLOps.
- **DevOps & Infrastructure:** AWS (Lambda, SageMaker, S3), Terraform, Docker, Kubernetes, Jenkins, GitHub Actions.
- **Programming:** Python (FastAPI, Flask), Java, SQL, JavaScript, Bash Scripting.
- **Platforms & Tools:** ServiceNow (CAD/CSA), Git, Linux, Infrastructure as Code (IaC).

DEVOPS & AI PROJECTS

Automated MLOps Pipeline for Serverless LLM Apps

Jan 2026 – Present

- Engineered a CI/CD pipeline for a serverless AI application using **AWS SAM** and **GitHub Actions**, automating the deployment of Python-based Lambda functions.
- Integrated **Terraform** to provision AWS SageMaker endpoints, enabling scalable inference for Large Language Models.
- Implemented automated unit testing for AI logic and containerized the application using **Docker** for consistent cross-environment performance.

AI-Driven Infrastructure Monitoring System

Oct 2025 – Dec 2025

- Developed a monitoring tool that utilizes **AI-based anomaly detection** to analyze AWS CloudWatch logs and predict potential system failures.
- Built a **ServiceNow** integration using Flow Designer to automatically trigger incident tickets based on AI-detected infrastructure risks.
- Optimized resource allocation by using AI insights to scale Kubernetes clusters dynamically, reducing cloud costs by 20%.

TECHNICAL PROJECTS

Full-Stack Finance Dashboard

Aug 2025 – Oct 2025

- Built a React-Node.js dashboard for real-time financial tracking, utilizing SQL for high-integrity data storage.
- Recognized with **"Best Presentation"** for demonstrating a secure, scalable architecture among 25 teams.

EDUCATION

Koneru Lakshmiah University, Vijayawada

Jul 2022 – May 2026

B.Tech in Computer Science and Engineering (Software Engineering)

Relevant Coursework: Generative AI, Cloud Computing, DevOps, Data Engineering.

CERTIFICATIONS

- **AWS Certified Cloud Practitioner**
- **ServiceNow Certified Application Developer (CAD)**
- **ServiceNow Certified System Administrator (CSA)**

COMPETITIVE PROGRAMMING

- **LeetCode / CodeChef:** Solving algorithmic problems to optimize backend performance and code efficiency.
