Professional Summary

Computer Science and Engineering graduate focused on full-stack, artificial intelligence, and cloud applications. Built and deployed multilingual platforms using React, Next.js, FastAPI, PostgreSQL, AWS, and Gemini API, with experience in secure authentication and role-based access.

Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Recharts, Context API, application workflow design

Backend & AI: FastAPI, Node.js, Express, Gemini API, SQLAlchemy, prompt engineering

Databases & Cloud: PostgreSQL, Supabase, AWS, Render, Vercel

Tools & Security: Git, GitHub, OAuth, JSON Web Tokens (JWT), role-based access control

Education

Koneru Lakshmaiah (KL) University | Vijayawada | 2022 - 2026

Bachelor of Technology in Computer Science and Engineering | **CGPA: 8.99**

Specialization: Software Modelling and DevOps

Projects

SPIILTO Connections - AI Meeting Assistant | [Live Demo](#)

React, TypeScript, Node.js, Express, Gemini API, OAuth, Render

- Built and deployed an AI meeting assistant that converts uploaded audio/video into transcripts, summaries, decisions, and action items
- Integrated multilingual transcription and selected-language translation, including Japanese, German, Hindi, and English
- Implemented Google/GitHub sign-in, password hashing, signed sessions, and role-based access controls
- Added human approval for follow-up actions, AI request retries, fallback models, and processing timeouts

ElectroFlow AI - Retail & Inventory Management Platform | [Live Demo](#)

Python, FastAPI, Next.js, TypeScript, PostgreSQL, SQLAlchemy, Supabase

- Developed a full-stack application for customer shopping, product management, inventory tracking, and order fulfilment
- Implemented JWT authentication, role-based access, invoice review, and barcode-based warehouse operations
- Built a mobile-responsive interface and deployed on Vercel and Render

RetailMate - Final-Year Project | [GitHub](#)

Team project | Frontend developer | React; team stack: AWS Lambda, DynamoDB, Terraform

- Designed the interface and application workflow, then implemented the frontend for a cloud-backed retail inventory application as part of a team
- Integrated inventory APIs into workflows for adding, editing, deleting, searching, and updating item quantities, alongside sign-up and sign-in flows

FinDash - Finance Dashboard | [Live Demo](#) | [GitHub](#)

Independent academic project | React, Tailwind CSS, Recharts, Context API

- Created income, expense, balance, and spending visualizations in a frontend dashboard, managing local application state with React Context and useReducer
- Enabled transaction search, sorting, filtering, and CSV/JSON exports to explore financial records and spending patterns in one interface

Certifications

[AWS Certified Cloud Practitioner](#) | [ServiceNow Certified System Administrator \(CSA\)](#)

[ServiceNow Certified Application Developer \(CAD\)](#) | [Microsoft Certified: Fabric Analytics Engineer Associate](#)

Achievements

- Applied data structures and algorithms through consistent practice on [LeetCode](#) and [CodeChef](#)
